SQL & Backend Developer | SDLC | Database Concepts | Analytical Problem-Solving

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on backend development experience through a Java Developer internship at DRDO (RCI), working across the SDLC to build and validate large-scale data processing systems. Comfortable writing SQL queries and applying relational database concepts (table relationships, keys, joins) across MySQL and MongoDB projects. Strong analytical, communication, and ownership skills as a self-motivated team player.

CORE COMPETENCIES

- **SQL & Relational Databases:** Writing and debugging SQL queries; applying table relationships, keys, and constraints in MySQL and MongoDB projects.
- **SDLC Exposure:** Worked through requirements, design, development, and validation phases while building a production-style log-processing system at DRDO.
- **Testing & Quality Mindset:** Validated large-scale data output for accuracy (timestamp/command parsing, hex-to-decimal conversion) — foundational exposure to system-testing/QA verification.
- **Analytical Skills:** Decomposed complex, unstructured log data into rule-based, manageable components.
- **Communication & Ownership:** Collaborated directly with DRDO engineers, translating requirements into working software with full ownership of delivery.

EXPERIENCE

Java Developer Intern | *Research Centre Imarat (RCI), DRDO* Aug 2025 – Dec 2025 | Hyderabad, India

- Designed and implemented a Java-based system to process large unstructured log files (timestamps, command identifiers, message payloads) — an end-to-end SDLC exercise from requirements to delivery.
- Developed a data segregation module to group log messages by command, applying core relational/data-organization concepts, with efficient file handling via BufferedReader/BufferedWriter.
- Calculated time differences between log entries and validated output accuracy — analogous to system-level test verification; built a rule-based HashMap/ArrayList architecture to support multiple command formats.
- Converted hexadecimal payload values to decimal using BigInteger; collaborated closely with DRDO engineers, adapting to evolving defense-system data formats and workflows.

PROJECTS

Towards Detection and Attribution of Cyber-Attacks in IoT-Based Systems — *Major Project (B.Tech) | Java, J2EE (JSP/Servlets), MySQL, Machine Learning*

- Built a system that automatically detects cyberattacks on IoT-connected industrial equipment by analyzing sensor and network data with a machine learning model.
- Developed a full-stack web application (IoT Server, Sub-Server, Data Owner, End User modules) using JSP, Servlets, and MySQL — writing SQL queries to manage data uploads, user access, and attack reports.

Data Segregation and Analysis — *DRDO Internship Project | Java, File Handling, Collections, BigInteger*

- Built a two-phase system for command-wise data segregation and analysis of log files, including automated grouping and hex-to-decimal conversion for accurate interpretation.

Dual Access Control for Cloud-Based Data Storage and Sharing — *Java/J2EE, MySQL, CP-ABE*

- Designed a secure cloud storage system using CP-ABE with dual access control (data + download requests) on a relational MySQL backend, protecting against EDoS attacks.

TECHNICAL SKILLS

- **Programming Languages:** Java, SQL, C, Python (basics)
- **Databases & Concepts:** MySQL, MongoDB — table relationships, keys, queries, indexing basics
- **Core Concepts:** Software Development Life Cycle (SDLC), Object-Oriented Programming, Data Structures, Machine Learning basics
- **Web Technologies:** HTML, CSS, JavaScript, React, Node.js, Express
- **Tools:** VS Code, MS Office (Word, Excel, PowerPoint)

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Anubose Institute of Technology | Dec 2021 – Jul 2025 | CGPA: 7.59

Intermediate
Krishna Veni Junior College | Jun 2019 – Apr 2021 | CGPA: 8.56

Secondary School Certificate (SSC)
Sri Sarada Vidyalaya | 2019 | CGPA: 9.2

LANGUAGES

- English – Full Professional Proficiency | Hindi – Professional Working Proficiency | Telugu – Native or Bilingual Proficiency
